PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience engineering web applications and enhancing software quality through test automation, transitioning into Security Operations / SOC Analyst roles. Automated 250+ test cases, reducing manual effort by 60% and QA cycles by 35% on Fortune 500 client applications. Currently completing a 5-month cybersecurity program at Offenso Academy (7 hands-on labs to date across SOC fundamentals and network packet analysis), building on earlier Blue Team exercise preparation (Windows VM and pcap network traffic analysis). Runs a self-hosted Wazuh 4.14.6 SIEM home lab ingesting logs from Windows endpoints. Applying systematic detection discipline, proven in QA, to security monitoring.

CORE COMPETENCIES

Test Automation (Selenium, TestNG, JUnit) | Regression & Functional Testing | SIEM Operations (Wazuh) | Log Ingestion & Monitoring | SOC Fundamentals | Network Traffic Analysis (pcap) | Windows VM Environment Setup | Linux | Test Strategy & Execution | Java & Python | MySQL

WORK EXPERIENCE

Offenso Academy

June 2026 - Present

Cybersecurity Training Program - Security Operations

- Completing a structured 5-month cybersecurity program covering SOC fundamentals, network packet analysis, and hands-on defensive security practice.
- Completed 7 hands-on labs to date, spanning SOC fundamentals and packet/network traffic analysis.

Career Break

February 2026 - May 2026

Transition into cybersecurity

- Career break between roles, followed by enrolment in the Offenso Academy cybersecurity program.

Aspire Systems Pvt Ltd India

January 2023 - January 2026

Associate Software Engineer - Testing

On-site

- Automated 250+ regression and functional test cases using Selenium WebDriver and TestNG over a 12-month period, decreasing manual effort by 60% and shortening QA cycles by 35% for enterprise client applications.
- Devised comprehensive test plans and automated test scripts utilizing Selenium and JUnit, accelerating defect identification and supporting high-quality software releases for complex enterprise solutions.
- Led the implementation of advanced testing frameworks such as Selenium and TestNG across 100+ modules, reducing release cycle defects by 35% and consistently supporting bi-weekly deployments.
- Developed and executed comprehensive games testing suites covering 100+ game modules, maintaining a defect leakage rate below 2% across bi-weekly release cycles.
- Engineered robust web application features by integrating RESTful APIs and modern UI frameworks, enhancing system scalability and user engagement for Fortune 500 clients.
- Presented quarterly knowledge-sharing sessions for the QA team, improving adoption of automated testing techniques across 100+ modules and improving bug detection rates.

Aspire Systems Pvt Ltd India

September 2022 - January 2023

Trainee

PROJECTS

Security Home Lab - Wazuh SIEM Self-hosted

Deployed and configured Wazuh 4.14.6 (open-source SIEM/XDR), ingesting logs from Windows Server and Windows 10 endpoints, with a Kali Linux attacker host generating telemetry for detection and monitoring practice. Ongoing.

Wazuh, SIEM, log ingestion, Kali Linux, Windows Server

Boot2root Lab Machines - 6 Rooted Self-hosted

Gained root on 6 vulnerable-by-design lab machines between July and August 2026: CryptoBank, GreenOptic, HF2019-Linux, Metasploitable, pwnlab and SickOS. Offensive practice run against the same lab network monitored by Wazuh.

Kali Linux, privilege escalation, enumeration, exploitation

Security Program Labs - 7 Completed Offenso Academy

Seven hands-on labs completed to date within a 5-month cybersecurity program, covering SOC fundamentals and network/packet traffic analysis. Program ongoing through November 2026.

SOC fundamentals, packet analysis

Blue Team Event Preparation Offenso Academy

Prepared the technical environment for a Blue Team cybersecurity exercise - set up the Windows VM and the pcap (packet capture) file used for network traffic analysis, for an event organized by Offenso Academy.

Windows VM, pcap

EDUCATION

Master of Computer Applications (MCA), Minor in AI Union Christian College Aluva, Ernakulam, Kerala 2022

Bachelor of Computer Application (BCA), Minor in Banking Chinmaya Vidhyapeet, Ernakulam, Kerala 2020

CERTIFICATIONS

Car Performance Prediction using IBM Watson Machine Learning	Smartbridge	2022
Design Thinking	Smartbridge	2022
Agile Training Module	Smartbridge	2022
DevOps Fundamentals	Smartbridge	2022
Machine Learning	Internshala	2021

SKILLS

Testing: Requirements Analysis, Unit Testing, Regression Testing, Exploratory Testing, Smoke Testing, Test Cases, Test Strategy, Test Execution

Tools & Technologies: Linux, Selenium, Python, Java, PhpMyAdmin, C++, MySQL, HTML, JavaScript, Windows VM environment setup, pcap/packet capture analysis
